

Survival Skills for Analysts

This comprehensive workshop helps business analysts complement their practical systems thinking with a thorough understanding of effective people skills. A few of the many important topics covered in Survival Skills for Analysts include understanding team dynamics and resolving interpersonal conflicts; improving communication skills; planning and managing meetings more effectively and achieving greater consensus and commitment. To help ensure students continue to cultivate these critical skills after completion of the workshop, an action plan is developed for ongoing personal development in the workplace environment.

FEATURES

- Our facilitators bring real-world experience to every workshop.
- Participants will be led, not lectured, through a combination of presentations and hands-on exercises.
- Our workshops provide an experiential environment where participants can take risks and make adjustments based on their results before approaching large projects.
- Our workshop is consistent with the International Institute of Business Analysis' *Guide to the Business Analysis Body of Knowledge (BABOK® Guide)*.

DISCOVER HOW TO

- Appraise group dynamics and effectively manage group situations.
- Identify individual and other stakeholder's Social Styles™ to improve relationships.
- Improve team dynamics and facilitate conflict resolution
- Communicate more effectively and actively listen
- Gain consensus and commitment from team members and other project stakeholders.
- Ask a variety of structured questioning techniques to gather information.
- Conduct an effective interview to gather stakeholder requirements.
- Apply various tools and techniques for problem solving.
- Make a specific plan for ongoing development.
